

MIHA FUND

The Vision Optimal liquidity, diverse 41% growth, steady profit, sustained prosperity through sound financial management

Problem: The problem with banks and investment management firms lies in their low and uncompetitive returns. But we offer an innovative solution: we contribute to the AI revolution, ensuring annual returns of 41% and investor asset recoupment within two years. With us, they can join our journey towards achieving the grand vision of \$50 billion by 2034.

Solution: Our company is focused on helping people grow their money through investments. We use a combination of human experience and advanced computer systems called artificial intelligence to make smart decisions about where to invest.

Imagine you have some money and you want it to grow over time, but you're not sure where to put it. That's where we come in. We have experts who have been studying how money works for a long time, and we also use special computer programs that can analyze a lot of information very quickly. Together, they help us figure out the best places to invest your money so that it can grow steadily over time.

Additionally, we ensure that investors can get their money back within two years. Our vision is to achieve an annual growth rate of 41% to reach a net worth of \$50 billion by 2034, providing our customers with even greater financial opportunities and security.

Business model: MIHA FUND: A Revolutionary Business Model Powered by AI and Quantum Strategies

At MIHA FUND, our business model is built on the integration of generative AI and quantum-driven advanced strategies, setting a new standard in the investment landscape. By utilizing these cutting-edge technologies, we create a highly efficient, client-focused approach that generates revenue while aligning with long-term financial success.

How Our Business Model Generates Revenue:

Management Fees: We earn fees based on the assets under management (AUM), ensuring a stable and scalable revenue stream as our clients' portfolios grow.

Performance Fees: Our performance fees are directly tied to the investment returns we achieve, further incentivizing us to deliver outstanding results.

Transaction Commissions: We also generate revenue from commissions on financial transactions, providing an additional layer of profitability.

Client-Centered Profit Structure:

Our model is designed with client success at its core.

Market: We use diverse channels to reach investors:

Direct Sales: Our team engages investors personally, understanding their needs to tailor offerings effectively.

Financial Advisors: We collaborate closely with advisors to offer comprehensive support.

Online Platforms: Leveraging digital platforms like our website and social media, we provide informative content to educate investors.

Networking and Events: Active participation in industry events allows us to connect with investors face-to-face, building trust and showcasing expertise.

Progress is tracked through metrics like acquisition, conversion, satisfaction, and retention rates, guiding data-driven adjustments for optimization.

Accomplishments: Starting with a sustainable 41% annual growth rate, our financial investment firm has achieved significant milestones:

Revenue Growth: Our steady revenue growth reflects the effectiveness of our investment strategies and customer acquisition efforts.

Traction: We've gained traction among individual and institutional investors, evidenced by increased clients and assets under management.

Major Investments: Securing major investments from reputable institutional investors validates our approach and instills confidence in our capabilities.
