

Contrackting Platform

All-in-one Solution for Construction Management

Construction Management Challenges

We are committed to empowering construction companies to overcome these issues

Over **70%** of contractors lack real-time insights into project progress

Over **60%** of construction projects experience delays due to lack of real-time updates

Over **80%** of construction professionals believe that adopting software solutions for scheduling and cost tracking can reduce delays and cost overruns

Over **55%** of construction firms have adopted cloud-based solutions for project management, with the number expected to grow significantly

Over **75%** of construction firms find that managing project costs is one of their biggest challenges

Manual tracking contributes to **\$1.8 trillion** in productivity losses in construction sector annually

Our Idea

Contrackting is a transformative project management platform that empowers construction companies to automate their management processes. Our mission is to revolutionize how tasks are completed, enabling them to be finished swiftly and effortlessly, with fewer planners and cost engineers on board, all while achieving the highest accuracy and real-time insight.
