About TOLIM

A Smart Platform Connecting Event Organizers with Verified Service Providers

TOLIM is a Saudi-born digital platform designed to revolutionize the event services market by seamlessly connecting clients — whether individuals, businesses, or organizers — with a wide range of professional service providers. These include both freelancers with a freelance license and registered commercial institutions.

From weddings in Riyadh to business conferences in Jeddah or cultural festivals in Abha, TOLIM empowers users to browse vendors, compare packages, view profiles and ratings, and book services effortlessly — all tailored to the type, mood, and location of their event.

Who Can Join as a Service Provider?

TOLIM welcomes two categories of service providers:

Freelancers holding a certified freelance work license.

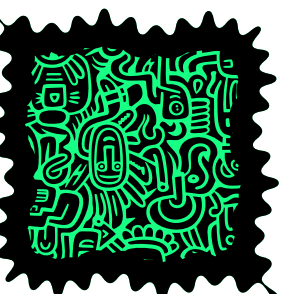

Institutions registered with a commercial license.

A flexible annual subscription model is in place:

Lower rates for freelancers.

Higher subscription fees for institutions.

(Exact fees vary by tier and are not disclosed at this stage.)

Revenue Model – Commission-Based Contracts

In addition to subscription fees, TOLIM earns revenue through a percentage commission on contracts made via the platform. This commission varies based on the contract type, scope, and service category, offering sustainable platform growth while maintaining fairness and competitiveness for providers.

Aligned with Saudi Vision 2030

TOLIM directly supports several goals of Saudi Arabia's Vision 2030, including:

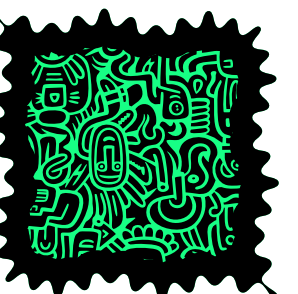

Job creation for Saudis: Empowering local freelancers and institutions to access real income opportunities via a streamlined digital platform.

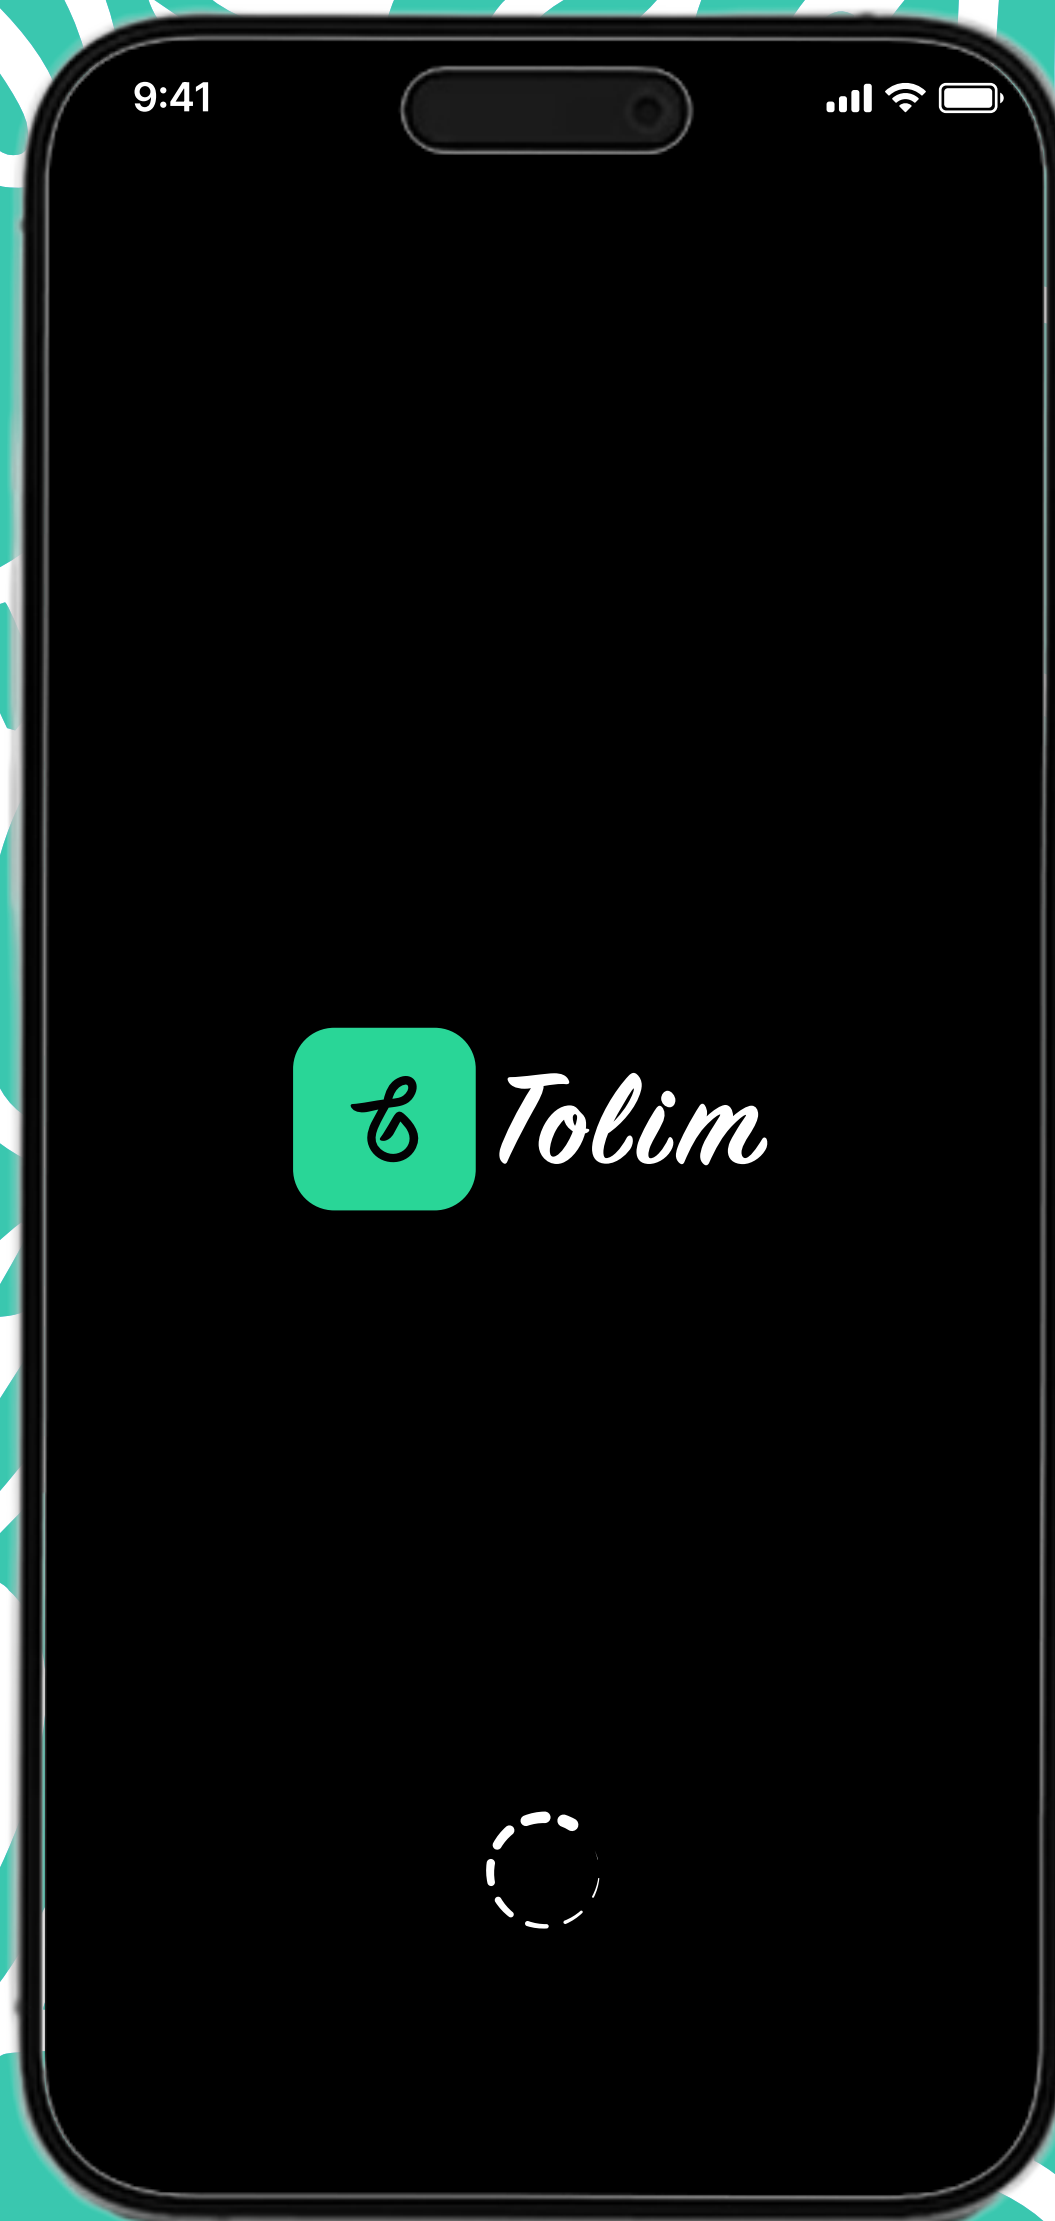

Private sector enablement: Supporting SMEs and independent professionals to scale through greater market exposure and operational support.

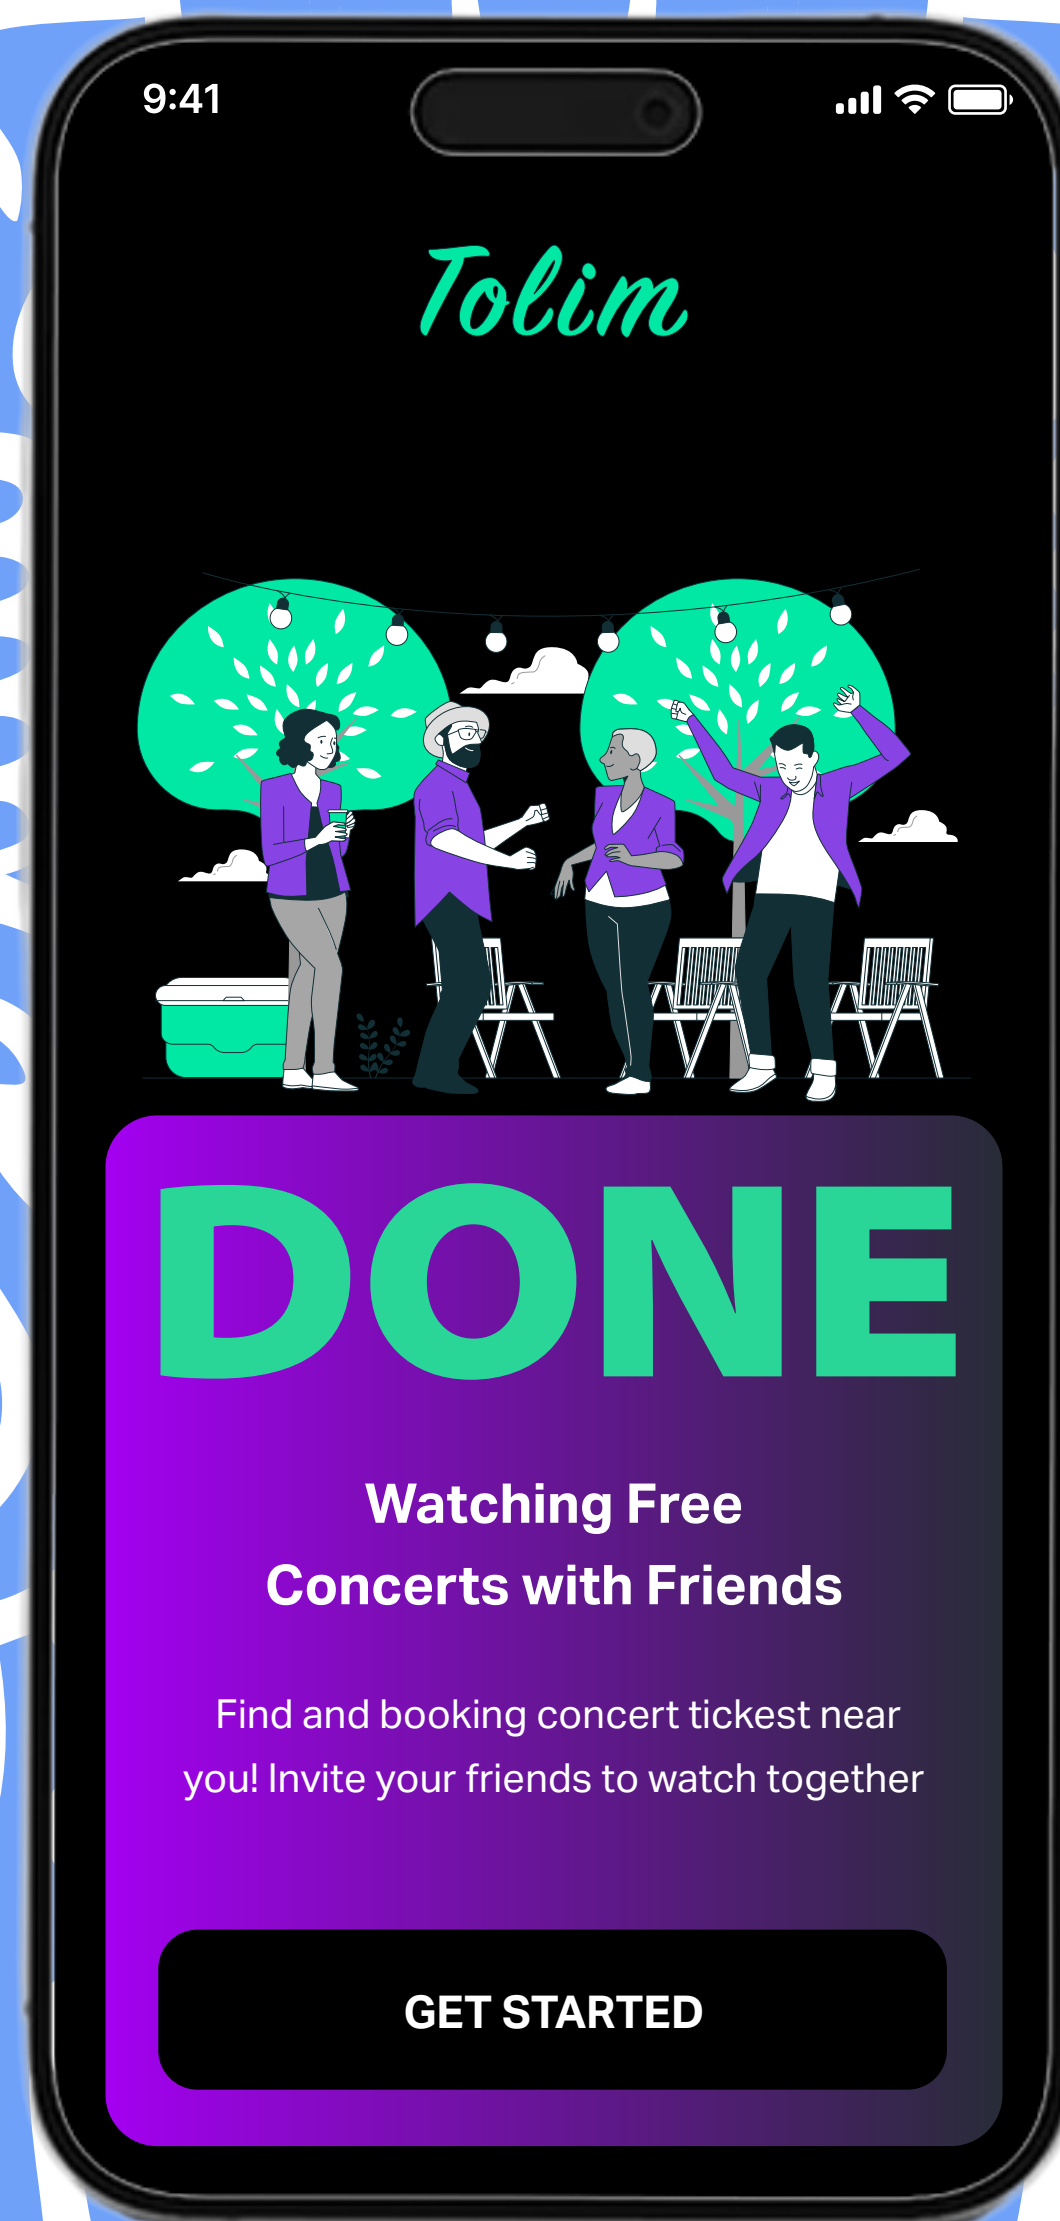

Improved quality of life: Enabling seamless organization of social, cultural, and business events, enhancing community engagement.

Digital transformation: Offering a fully integrated ecosystem for booking, communication, evaluation, and payment.

Tourism & entertainment sector development: Helping build the service backbone for events and activities across the Kingdom.

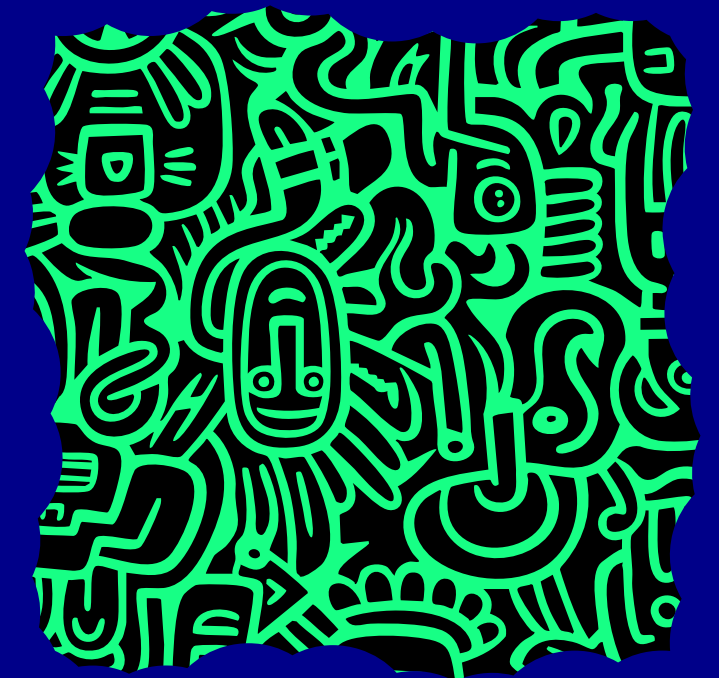

TOLIM ?

TOLIM is a smart platform that specializes in event management and coordination, seamlessly connecting service seekers (individuals or businesses) with service providers (freelancers or companies). The goal is to deliver a smooth, inspiring, and fully integrated event planning experience.

Whether you're looking for a professional photographer, party planner, DJ, painter, traditional band, coffee service, or full event management company, TOLIM offers a wide range of options, smart suggestions, and ready-made packages tailored to your event type, vibe, and location.
