Agentic Workflows-as-a-Service

Delivering production-ready AI agentic workflows as a service

- No prompt engineering
- No AI Expertise Needed
- Just outcomes.

Pre Built workflows that process documents, extract insights, and deliver outcomes — instantly.

The Core Problem

AI Transformed How **Workflows** Get Done— But **Left SMBs** Behind

Today, **entire jobs and workflows** —from legal contract analysis to recruitment — **can be fully automated using AI.**

The Reality Gap:

Enterprises: Deploy custom AI agents for every workflow

SMBs: Still doing everything manually

Why SMBs Can't Access This:

01 Cost Barriers

Each AI workflow costs \$50K–\$100K+ in engineering and infrastructure

02 Talent + Complexity

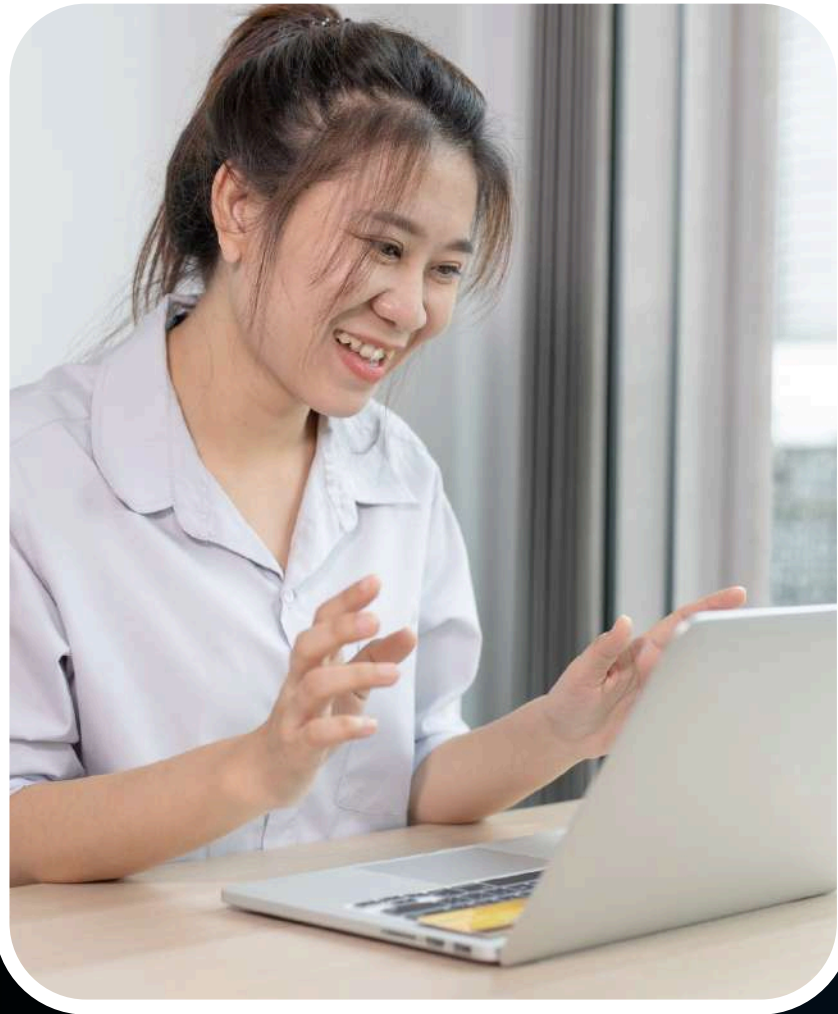

Most SMBs can't afford expensive AI dedicated teams to build and maintain complex solutions.

03 AI Tools keep evolving

and most teams don't know what to use or how, making it nearly impossible for small businesses to adapt AI .

Our Solution

DataCove = Pre-built Agentic Workflows

01

Choose Workflow

Pick your domain -> Upload Your Files -> Get structured insights

02

Let AI work

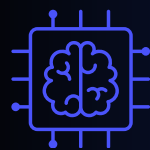

We orchestrate the best models, techniques, and logic

03

Final Outcome

You get accurate, explainable results in minutes

What we have built

Flow Engineering Framework

Modular, multi-agent orchestration with conditional logic and reasoning chains.

Prompt Engineering Engine

Custom prompt stacks optimized workflow, with built-in context compression and routing.

2 Patent-Applied Frameworks

Agent Orchestration and Workflow packaging technique for plug-and-play deployment.

Model Fine-Tuning & Embedding

Use of custom embeddings, supervised fine-tuning for vertical-specific accuracy.

Custom SLMs + LLMs Abstraction

Lightweight, fine-tuned models for domain-specific tasks + Dynamic model routing based on cost, latency, and accuracy

Why We can't be copied

Our Technical Moat:

- Domain-Specific Intelligence
- Custom fine-tuned models, not just LLMs
- Every workflow run improves accuracy
- Customer feedback enhances models
- Pre-built – Zero-Setup Architecture
- Compliance rules hard-coded per region
- 18-Month Execution Head Start
- Each Customer Strengthens All – Network Effect

Reality Check:

- ChatGPT: 12% accuracy
 - Misses industry-specific terms
 - No jurisdictional awareness
- Zapier + AI: 31% accuracy
 - Can't handle exceptions
 - No domain reasoning
- DataCove: 89% accuracy
 - Knows compliance by region
 - Delivers case-ready output

What We're NOT

Not This

(The Common AI Noise)

- Generic GPT Wrappers
- Prompt Libraries You Have to Maintain
- Open-Ended AI Chat with No Structure
- Requires Internal AI/Tech Expertise
- Complex, Slow Setup & Integration

This is DataCove

(What Businesses Want)

- Structured, Outcome-Driven AI Workflows
- Pre-Built, Vertical-Specific Agents
- Plug-and-Play Delivery — Zero Setup
- Designed for SMBs & Mid-Market Teams
- No Prompts, No Tuning, Just Results

Market Size

TAM

Entire AI-as-a-Service Market

\$67B

SAM

SMB Automation

\$12.3B

SOM

Our 3 Year Target

\$125M

Comparable Growth:

Zapier: \$0→\$140M in 4 years (simpler workflows)

Monday: \$0→\$130M in 3 years (no AI)

DataCove: AI-native + 100 workflows = faster trajectory
10,000 SMBs on waitlist = \$125M pipeline

Early Traction & Validation

What Our Early Adopters Say:

"DataCove reduced our document review time from 3 days to 3 minutes. We're closing deals faster than ever."

— Abhishek Tanwar, Partner at Hurliis Law

- 8 Active Pilots (Unpaid)
- \$180K in LOIs
- \$15K ACV target price

Recruitment Firms: –

- Pain: 500 resumes -> 5 candidates in days
- Gain: AI matching in minutes
- Price Sensitivity: Medium
- Our Edge: Semantic understanding

Legal Firms: –

- Pain: 70% time on documentation
- Gain: 3 days -> 3 minutes
- Price Sensitivity: Low (bill \$300/hr)
- Our Edge: Compliance accuracy

Roadmap

Now

Core infrastructure + **MVP launched** with 10+ workflows

Next 3–6 months

Build additional high – **100+ demand workflows**
(PII validation, research agents, dark web scan)

Plug-ins/ MCP API

API delivery + Launch **B2B** API Marketplace

Next 6–12 month

AI **workflow** customization **studio** marketplace

Path to \$1M ARR

- Q3 2025: Convert 8 pilots -> \$96K ARR
- Q1 2026: Add 50 law firms -> \$600K ARR
- Q2 2026: Add 50 recruiters -> \$1.2M ARR

Funding Request

Seed Round: \$1M Allocation

Use of Funds	Allocation
Product Development + AI Team	45%
Marketing & Sales	30%
<i>Compliance & Security Enhancements</i>	15%
LLMs + MCP + Infrastructure Scaling	10%

Meet our Team

We're builders who've seen AI from the inside out — and know the gap between demos and deployment.

Vicky Singh Rajput
CTO & Product Head

AI Engineer with Fortune 500 experience
Agent orchestration and infrastructure

Vivek Ghartan
CEO & Finance Head

Serial entrepreneur (Pragra.io, +2 Startups)
Generated \$5M+ revenue and Scaled

Akhil Singh
Dev & Cloud Head

Sr. Technical Lead
AI & Development Expertise

Future of Agent-as-a-Service is here

datacove.ai

"We believe the next phase of AI isn't about building — it's about accessing value instantly.

DataCove is the App Store for real, usable AI workflows. We're not building agents. We're delivering outcomes — at scale."
