

About Jusoor Labs

Jusoor Labs is an EdTech startup founded in 2021, specializing in interactive 3D simulations and virtual labs for students and educational institutions.

Why Jusoor Labs?

Over **800 Million** students lack resources for science experiments.

Accessibility Limits

Limited access to laboratories during specific class times restricts opportunities for hands-on learning.

Safety Concerns

Safety concerns significantly limit opportunities for hands-on learning experiences for students.

Financial Burden

Traditional labs require financial investments in materials and equipment.

Our Solution

Accelerated Learning

Experiment 10x faster—what took 50 minutes in a physical lab now takes just 5 minutes in Jusoor Labs, anytime, anywhere.

Cross-Platform

Enter Jusoor Labs effortlessly from any device, be it a PC or mobile, and enjoy flexible learning environments for students everywhere.

Cost Savings

Slash traditional lab setup and operational costs by up to **70%**, reducing the expense of science education and improving accessibility.

Jusoor Labs Services

Jusoor Labs offers interactive 3D virtual labs that replicate the experience of a physical laboratory. Our simulations in subjects like chemistry, physics, and biology allow students to conduct experiments online, mastering advanced techniques and equipment that might be otherwise inaccessible. With Jusoor Labs, educators can provide safe, engaging, and budget-friendly lab experiences to all students.
